

## File Setup Specifications

### Files Supported (ready-to-run Mac or PC):

- InDesign QuarkXpress
- Adobe Photoshop™, Illustrator™
- TIFF, EPS,

*Tip: File should be setup using a page layout program (e.g. QuarkXpress). The page size should be setup at an intermediate size that can be enlarged proportionately. For example, 12 x 18" original page size, can be enlarged 300% for a final output size of 36" x 54".*

### Fonts:

- Ensure that all fonts specific to your job are included or "suitcased". This includes both screen and printer fonts.
- For CorelDraw files, please convert all fonts into curves and save as an Adobe Illustrator AI, EPS file format.

### Scanned Images:

For optimal resolution and results, please use the following guidelines:

- For most images, scanning at a resolution of 72dpi, **at full size will yield excellent results**. For large images being viewed at far distances, a scan resolution of 36dpi at full size will be more than sufficient.
- Scan images in RGB mode before converting to CMYK
- Save images as Photoshop, EPS, JPEG or TIFF formats

*Tip: If in doubt, please provide an RGB file size between 25-50Mb (interpolation is not recommended!)*

### Disk Media Supported:

- Floppy disks, CD's, DVD's, USB Flash
